### <u>Differences Between Wills</u> and Living Trusts

Both Wills and Trusts are devices that you can use to provide for the distribution of your estate upon your death. Deciding whether a Will or a Trust best fits your needs depends on your circumstances. A living Trust is a popular alternative to the traditional Will, but you should weigh the advantages and disadvantages of each before deciding on one form or the other.

|                           | Will   | Living Trust  |
|---------------------------|--|---|
| Probate                   | Subject to probate proceedings. Out -of-state property requires probate proceedings in that state, as well. Provides court supervision for handling beneficiary challenges and creditor disputes. Becomes public record at the time of your death. | Not subject to probate proceedings. Avoids the cost of a second-state probate proceeding where there is out-of-state property. No automatic court supervision to deal with disputes. Remains private. |
| Tax Savings               | Same tax saving provisions available as are available in a Trust.  |   |
| Management of your Assets | In addition to the Will, must use a Power of Attorney or Conservatorship to manage assets.   | Allows you as the grantor to manage the Trust assets as long as you are willing and able.  Makes provisions for a successor trustee to take over in your place.                                       |
| Costs                     | Costs less to prepare a Will than a Trust. Cost to probate a Will can be substantial.  | Costs more to prepare, fund and manage a Trust than to prepare a Will. But avoids probate costs if all assets were held by the Trust.   |
